Subject Index

adaptive integration 207, 309
adjoining cell mapping 207, 309
amplitude equations 605
autoparametric resonance 111
averaging 289
axisymmetric gyrostats 269

backward Kolmogorov equation 357
bifurcation(s) 25, 251, 389, 433, 499
  analysis 605
buckled beam(s) 499, 547
Butenin method 1

cable-stayed bridge 111
cantilevered beams 227, 337, 461
central force field 269
chaos 25, 139, 153, 389, 499, 655
chaotic motion(s) 269, 433
Chebyshev polynomials 483
circular orbit 269
complex function 139
constraint convergence 51
constraint stabilization 51
constraint violation 51
contact analysis 83
control structure interaction 183
Coulomb friction 25
coupled mode dynamics 433

Duffing oscillator 279, 357
dynamic simulation 51
dynamic stability 573
dynamics 153
  coupled mode 433
  inverse 183
  Lagrangian 183
  multibody 51, 83, 183, 635
  nonlinear 51, 183, 605

elliptic functions 373
energy balance 635
entrainment 413
experimental results 547
finite elements 357
  method 183
  modeling 83

first passage problem 357
fluidelasticity 655
Fokker–Planck equation 357
free response 1

geometric nonlinearity 111

homoclinic orbit 389

implicit function 39
instability 1
internal damping 413
internal resonance 547, 635
invariant torus 289
inverse dynamics 183

Lagrangian dynamics 183
limit cycles 207, 309
linear oscillator 357

Melnikov criterion 139
method(s)
  Butenin 1
  finite element 183
  of multiple scales 573
  penalty 51
  two-parameter perturbation 39
multibody dynamics 51, 83, 183, 635
multifurcation 547
multiple scales 547

nonlinear 655
  aeroelasticity 531
  analysis 227, 337, 461
  autonomous dynamical systems 207, 309
  dynamic systems 483
  dynamics 51, 183, 605
  effects 251
  oscillations 547
  oscillator 289
  resonance 573
  systems 373
  vibration 357, 635
numerical integration 483
numerical simulation 547

Nonlinear Dynamics **4**: 671–672, 1993.

orthogonal pendulum 605
oscillator
  Duffing 279, 357
  linear 357
  nonlinear 289
  van der Pol 289, 357

panel flutter 531
parametric excitation 483
parametric resonance 499
passage through resonance 461
penalty methods 51
periodic and aperiodic solutions 483
periodic orbits 39
Picard iteration 483
plate 389
primary resonance(s) 227, 433
probability density 279, 373
probability distribution 357

quasi-harmonic analysis 279

random excitation 279
random vibration 357
recursive algorithms 207, 309
resonance(s)
  and non-resonance cases 39
  autoparametric 111
  internal 547, 635
  parametric 499
  primary 227, 433
  secondary 337
rotating shaft 413
rotors 153

saturation 111
secondary resonances 337
simple cell mapping 207, 309
singular perturbation problems 251
slider-crank mechanism 573
spatiotemporal chaos 531
spinning satellites 269
stability 153, 655
stochastic averaging 373
stochastic processes 357
string 1
subharmonic oscillation 413

time-variant constraint 83
transient responses 461
turbulence 531
turbulence via chaos techniques 251
two-parameter perturbation method 39

universality 25

van der Pol oscillator 289, 357

whirling motion 227, 337
